We are Warriors

Write-Off Warrior holds taxpayers accountable for their transactions, as well as helping taxpayers take the most deductions using blockchain technology.

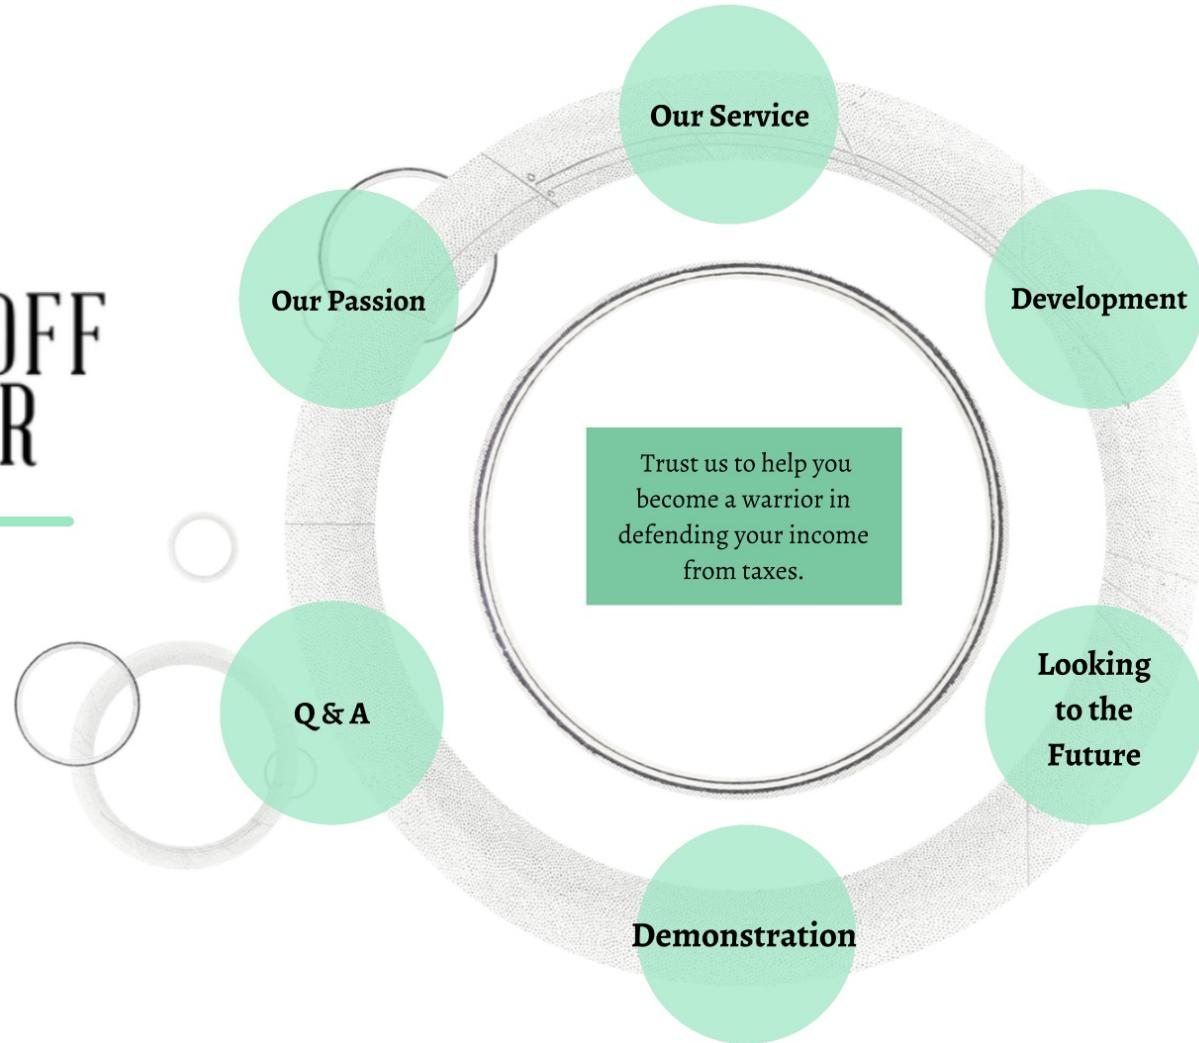

Combining traditional accounting with advancing technology, we developed an application that bridges the gap, bring accounting and taxation into the future.

Making Tax Deductions Easier

For many people, keeping up with deductions, charitable contributions, and other write offs can be a hassle.

What if there was a way to track every transaction, complete with photo evidence of payment, so that come tax season, filing deductions was as easy as clicking a button?

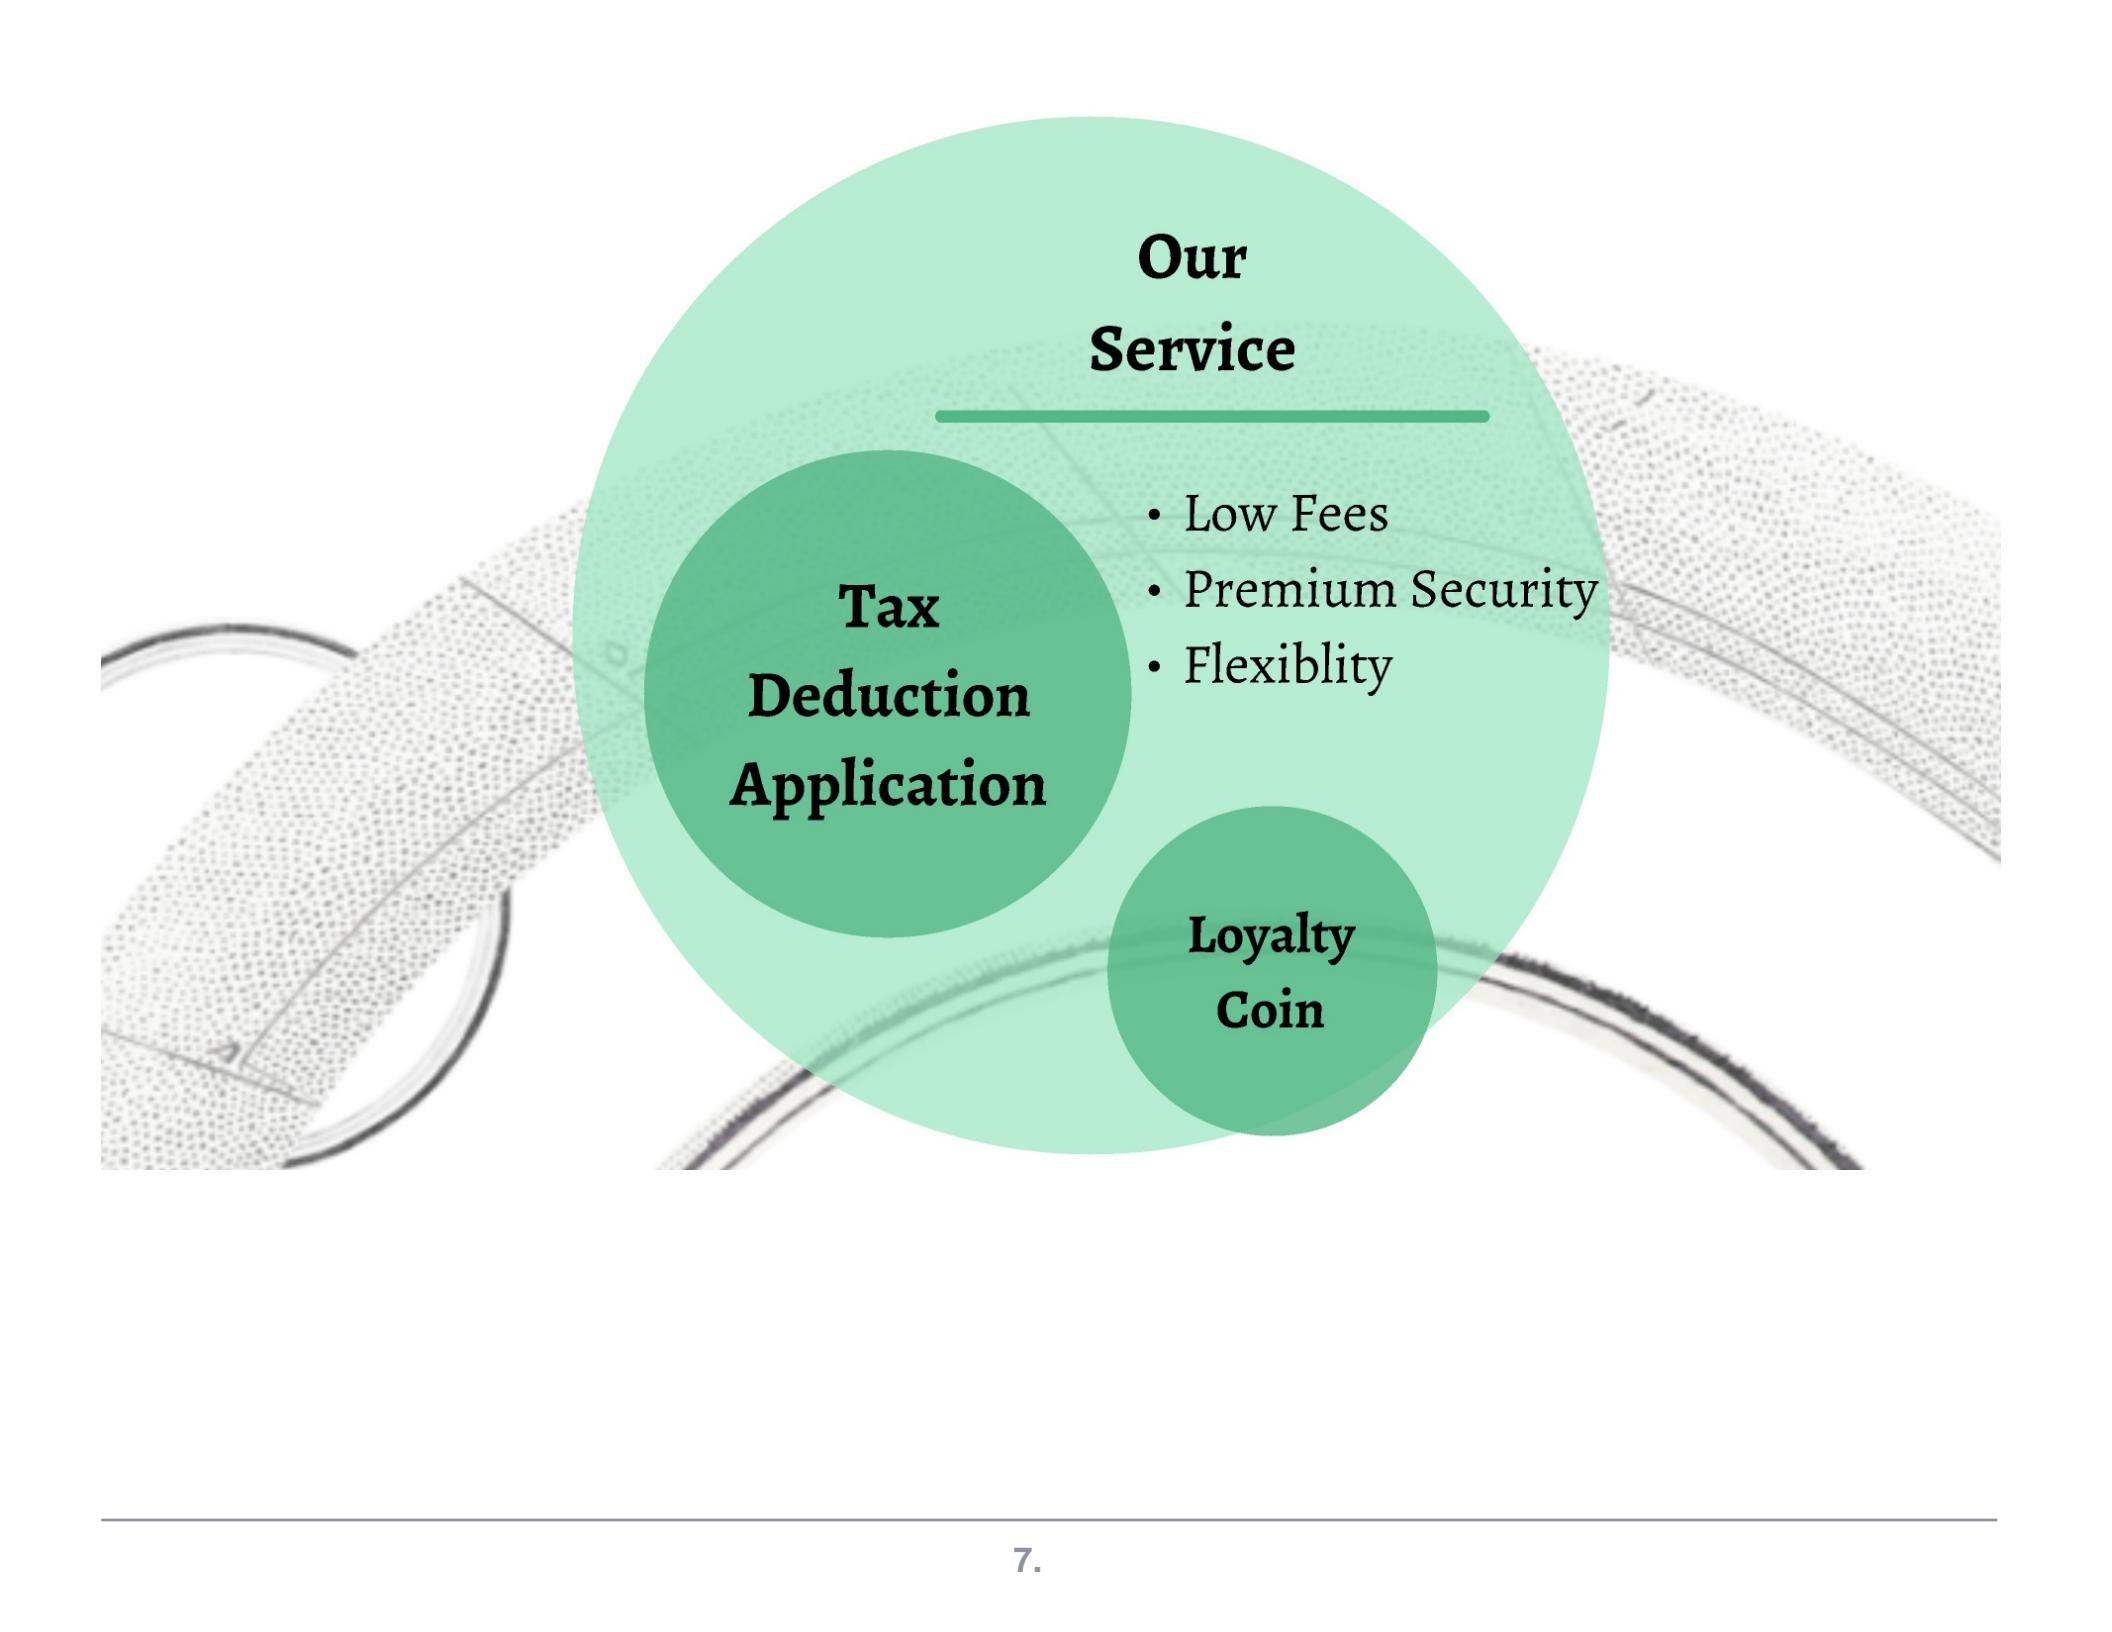

Solution:

Inter-Planetary File System (IPFS)

Individual users can input multiple deduction transactions with photos of receipt which is hashed and stored on a decentralized network as well as being linked to the transaction.

A CSV, and a Coin, for every user.

INVEST IN US AND WE WILL INVEST IN YOU

As we seek to make our customers financially successful, we also believe in loyalty. By doing business with us, we give each customer a loyalty coin. Our cryptocurrency coin (WOWcoin) is backed by Ethereum and is distributed upon initial business transaction with Write-Off Warrior.

- One Coin for signing up
- One Coin for referring friends
- Half-coin every month you submit your data for reconciling and approval.
